

**Lav Tandon**, is project and technical lead for Pre Detonation Bulk Sample Analysis Program (BSAP) for various federal agencies including the Federal Bureau of Investigation, Department of Homeland Security, Department of Energy (Office of Intelligence and Emergency Response) at Los Alamos National Laboratory. He works in Actinide Analytical Chemistry group as a Research and Development scientist since 1997. He is a principal investigator on multiple projects in the area of stockpile sustainment, nuclear forensics including signature development, non proliferation and international collaborations with various countries including Japan, United Kingdom, and European Union. His areas of research include: signature development for nuclear forensics, radiochemistry, actinide analytical chemistry, standards development, and radiation chemistry. He has over 125 publication to date, including in peer reviewed journals. He obtained his Ph. D. in Radioanalytical/Nuclear Chemistry from the University of Kentucky under the direction of Prof. Bill Ehmann. Upon completing his Ph. D. he was a Postdoctoral Fellow at the National Institute of Standards and Technology (NIST) in the Nuclear Methods Group in Maryland. Prior to joining LANL he was a scientist at State of New Mexico's Environmental Laboratories in Radiochemistry division for around one year and taught chemistry at the undergraduate level for three years at various institutions in New Mexico.
